## Characteristics and typical fields of application

Seamless all positional metalcored wire, Nickel alloyed, metal cored wire for single- or multilayer welding of carbon, carbon-manganese and high strength steels with Ar-CO<sub>2</sub> shielding gas.

Features include: high yield, good weldability, excellent bead appearance, very low spatter losses and exceptional mechanical properties at low temperatures (-60°C) in as welded conditions as well after post weld heat treatment. This wire is especially suitable for root-pass welding in off-shore and pipeline applications. This product can be used in sour gas applications. (HIC tested acc. to NACE TM-0284). Test values for SSC are available upon request. This wire is CTOD tested at -40°C.
